

or rolling-5 method may amend the plan to provide that only the contributions of significant withdrawn employers shall be excluded from the denominators of the fractions used in those methods.

(2) For purposes of this paragraph (c), “significant withdrawn employer” means—

(i) An employer to which the plan has sent a notice of withdrawal liability under section 4219 of ERISA; or

(ii) A withdrawn employer that in any plan year used to determine the denominator of a fraction contributed at least \$250,000 or, if less, 1% of all contributions made by employers for that year.

(3) If a group of employers withdraw in a concerted withdrawal, the plan shall treat the group as a single employer in determining whether the members are significant withdrawn employers under paragraph (c)(2) of this section. A “concerted withdrawal” means a cessation of contributions to the plan during a single plan year—

(i) By an employer association;

(ii) By all or substantially all of the employers covered by a single collective bargaining agreement; or

(iii) By all or substantially all of the employers covered by agreements with a single labor organization.

**§ 4211.13 Modifications to the direct attribution method.**

(a) *Error in direct attribution method.* The unfunded vested benefits allocated to a withdrawing employer under the direct attribution method are the sum of the employer’s attributable liability, determined under section 4211(c)(4)(A)(i) and (B) of ERISA, and the employer’s share of the plan’s unattributable liability, determined under section 4211(c)(4)(E) and allocated to the employer under section 4211(c)(4)(F). Plan sponsors should allocate unattributable liabilities on the basis of the employer’s share of the attributable liabilities. However, section 4211(c)(4)(F) of ERISA, which describes the allocation of unattributable liabilities, contains a typographical error. Therefore, plans adopting the direct attribution method shall modify the phrase “as the amount determined under subparagraph (C) for the em-

ployer bears to the sum of the amounts determined under subparagraph (C) for all employers under the plan” in section 4211(c)(4)(F) by substituting “subparagraph (B)” for “subparagraph (C)” in both places it appears.

(b) *Allocating unattributable liability based on contributions in period before withdrawal.* A plan that is amended to adopt the direct attribution method may provide that instead of allocating the unattributable liability in accordance with section 4211(c)(4)(F) of ERISA, the employer’s share of the plan’s unattributable liability shall be determined by multiplying the plan’s unattributable liability determined under section 4211(c)(4)(E) by a fraction—

(1) The numerator of which is the total amount of contributions required to be made by the withdrawing employer over a period of consecutive plan years (not fewer than five) ending before the withdrawal; and

(2) The denominator of which is the total amount contributed under the plan by all employers for the same period of years used in paragraph (b)(1) of this section, decreased by any amount contributed by an employer that withdrew from the plan during those plan years.

**Subpart C—Changes Subject to PBGC Approval**

**§ 4211.21 Changes subject to PBGC approval.**

(a) *General rule.* Subject to the approval of the PBGC pursuant to this subpart, a plan, other than a plan that primarily covers employees in the building and construction industry, may adopt, by amendment, any allocation method or modification to an allocation method that is not permitted under subpart B of this part.

(b) *Building and construction industry plans.* Subject to the approval of the PBGC pursuant to this subpart, a plan that primarily covers employees in the building and construction industry may adopt, by amendment, any allocation method or modification to an allocation method that is not permitted
